Monitoring Safety Relays with Delayed Outputs

Specifications

Minotaur MSR138DP

Description

The MSR138DP is a versatile monitoring safety relay. It can be connected in four different input wiring configurations: 1 N.C., 2 N.C., or 2 PNP connections from a light curtain. When connected in the 2 N.C. fashion, the MSR138DP checks for cross faults across the two inputs. When connected to light curtains, the light curtain must perform the cross fault detection.

The MSR138DP has output monitoring that can accommodate either automatic/manual reset or a monitored manual rest. When configured with automatic/manual reset (jumpers on X1-X2 and X3-X4), the MSR138DP can have the reset terminals S33-S34 jumpered or can be converted to an unmonitored manual reset by adding a normally open switch in the monitoring loop (S33-S34). When configured to monitored manual reset, the MSR138DP checks the output monitoring circuit through the manual application of the reset switch.

The outputs of the MSR138DP include 2 normally open immediate safety outputs and 3 normally open delayed safety outputs. The outputs of the MSR138.1DP include 2 normally open immediate safety rated outputs, 2 normally open delayed safety outputs and 1 normally closed delayed safety output. The safety outputs have independent and redundant internal contacts to help onesure the independent and redundant internal contacts to help ensure the safety function.

A N.C. timer reset switch can be added to force the delayed contacts opened prior to the completion of the timing cycle. An electronic protection circuit detects shorts across the input, when the MSR138DP wired for cross fault detection.

Features

- Category 4/3 per EN 954-1

- Stop category 0 and 1
 Light curtain, E-Stop, Safety Gate inputs
 2 immediate safety outputs
 Delayed outputs: 3 safety or 2 safety and 1 aux.
- Cross fault monitoring
- Monitored or automatic reset
- Removable terminals

Specifications			
Standards	EN 954-1, ISO 13849-1, IEC/EN 60204-1, IEC 60947-4-1, IEC 60947-5-1, ANSI B11.19, AS4024.1		
Category Instantaneous/Delayed	Cat. 4/Cat. 3 per EN 954-1		
Approvals	C-Tick, CE marked for all applicable directives and cULus		
Power Supply	24V AC/DC, 115V AC or 230V AC 0.8 to 1.1 x rated voltage, 50/60Hz		
Power Consumption	4W		
Safety Inputs	1 N.C., 2 N.C. or light curtain		
Input Simultaneity	Infinite		
Max. Allowable Input Resistance	135 ohms		
Reset	Monitored Manual or Auto./Manual		
Outputs	2 N.O. Safety; 3 N.O. Safety Delayed (MSR138DP); 2 N.O. Safety Delayed (MSR138.1DP); 1 N.C. Aux. Delayed (MSR138.1DP)		
Output Utilization per IEC 60947-4-1 (Resistive)	AC-1: 7A/250V AC DC-1: 7A/24V DC		
• Output Utilization per IEC 60947-5-1 (Inductive)	B300, AC-15 6A/250V AC, 6A/125V AC P300, DC-13; 3A/24V DC 6A/24V DC @ 6 ops/min		
Thermal Current (non switching) Units with 24V AC/DC supply: Units with 115/230V AC supply:	Max 7A in one current path 5x3.5A or 3x4.5A 5x2.5A or 3x3.5A		
Fuses Output (external)	6A Slow Blow or 10A Quick Blow		
Min. Switched Current/Voltage	10ma/10V		
Contact Material	AgSnO ₂ + 0.5mAu		
Power On Delay	1s		
Power On Delay Response Time	1s 15ms
